

Can you make a famous building from recycled materials?

Your task:

- Think about a famous building you would like to make e.g. Eiffel Tower, Empire State Building, Sydney Opera House, Tower of Pisa etc.
- Then research your famous building and create a fact file (you can display your fact file however you would like). Here are some questions that might help you to create your fact file:
 1. Where is your famous building in the world?
 2. When was it built?
 3. How many days did it take to build?
- Take photos (use pic collage) to show me how you made your building.
- Think about what recycled materials you could use; cardboard, straws and plastic?

I have included some ideas and I can't wait to see what you can make and what facts you find too.

Miss L Bennett

London Eye

Eiffel Tower

St Basil's Cathedral

Empire State Building

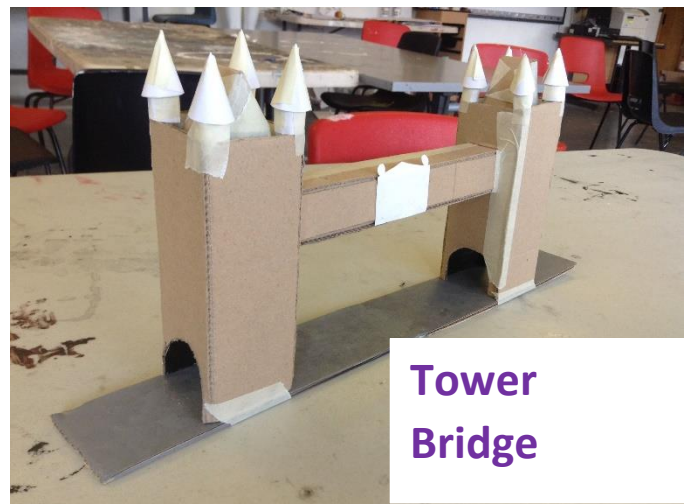

Leaning Tower of Pisa

The White House

Sydney Opera House

Tower Bridge
