

## Family History Project

As you are spending lots of time together as a family, why not create a 2021 time capsule? This is a great opportunity to collect together photos, drawings, letters, little notes or special objects and keep them safe to open in the future when you're older.

Follow the steps below and see what interesting objects you can find.

### Step 1

Find a container with a lid to keep all of your special memories inside

### Step 2

Write a letter to yourself to be opened in a certain amount of time Explain how you're doing today, and what you've been doing. Don't be afraid to give "boring" details, you never know what will be fascinating in 10 years.

### Step 3

Take a current photo of each family member, and one of the whole family.

### Step 4

Collect together any special objects that you might like to include such as a toy, certificate, medal or something you have made. It will be amazing to look back on them in the future.

### Step 5

Decide when you will open your capsule. In a year, 5 or even 10 years.

### Step 6

Put the capsule somewhere safe and dry, where you won't forget about it.

### Step 7

Mark the date to be opened on the time capsule in large permanent writing.

Don't Forget to share your amazing time capsules on Teams!
